SUMMARY

Curious, creative, and always building, I'm a Computer Science student deeply immersed in the worlds of design, development, and emerging tech. I craft digital experiences that go beyond visuals, blending storytelling, interactivity, and usability into every project. From intuitive UI/UX to fully functional web apps, I love bringing ideas to life where design meets development. Recently, I've been integrating AI into my workflow—experimenting with smart agents and tools to make products more intelligent, fun, and user-friendly. For me, magic happens where code and creativity collide—and I'm always up for the next challenge.

PROFESSIONAL EXPERIENCE

UI/UX Developer, SilicoXplore – Bangalore, India   Dec 2024 – Present
Researched modern UX trends and user feedback to propose design improvements.
Implemented intuitive solutions that enhanced product usability and user engagement.
