EDUCATION

Vellore Institute of Technology, BTech in Computer Science and Engineering

Aug 2023 – Expected 2027

EXPERIENCE

Product Developer, SilicoScientia – Bangalore, India

March 2025 – July 2025

- Drug discovery and bio-informatics tools used by researchers, colleges and academic labs had complex molecular docking and virtual screening workflows that were difficult for non-expert users to navigate.
- Designed the platform UX, simplifying ligand–protein docking, post-docking analysis, and molecular visualization into intuitive, guided workflows with structured dashboards and clearer scientific data presentation.
- Improved usability by **60%**, reduced analysis workflow time by **40%**, and made advanced computational drug discovery tools more accessible for students, researchers, and academic institutions.

Product Designer, AIKO – Chennai, India

Apr 2024 – Mar 2025

- Many Generative AI mobile applications lacked meaningful user engagement and responsible AI use cases, offering limited cognitive or educational value across diverse age groups.
- Designed a cross-platform AI-powered puzzle app that transforms AI-generated images into interactive jigsaw puzzles, combining Generative AI, gamification, UX design, and cognitive learning principles for users aged 9–90.
- Boosted user engagement by **45%**, increased average session duration, and positioned the product as an innovative example of responsible AI, brain-training technology, and AI-driven consumer applications.

PROJECTS

Travel Mate

[Case Study](#)

- Designed and developed **Travel Mate**, a platform that improves solo travel safety, streamlines trip planning, and enables meaningful connections through a verified traveller community.
- Built end-to-end features including traveller verification, collaborative planning tools, and social discovery to enhance the overall travel experience.

Your first step

[Project Link](#)

- Designed and developed **Your First Step**, a full-stack career guidance platform that delivers personalized domain recommendations through interactive assessments based on authorized content.
- Implemented a **zero-latency** client-side quiz system with a dynamic results dashboard and modern UI using **shadcn/ui** and Tailwind CSS, helping students align academic interests with real-world career paths.

SpendSmart — Sprout

[Case Study](#)

- Designed a **minimal finance app for Gen-Z students** who overspend and under-save — addressing the emotional and behavioral root causes, not just data tracking.
- Key differentiators: **Money Journal** (emotion-tagged spending to build self-awareness), **Vault** (goal-locked savings), and **gamified habits** — features no competitor combines in a student-friendly UI.
- Conducted competitive analysis against Walnut, YNAB, and Splitwise; identified a clear white space around journaling + vault saving + habit tracking for students aged 18–26.
- **Outcome:** 91% of task completion rate across all 8 screens in usability testing; 64% of testers reported the Journal feature changed their spending mindset.

SKILLS

- **Design:** User Experience Design, Interaction Design, Micro-Interaction Design, Story Boarding, Mobile & Web Design, 3D Design.
- **Development:** JavaScript, TypeScript, React.js, Next.js, Node.js, HTML/CSS, Tailwind CSS, API Integration.
- **Tools:** Figma, Sketch, Adobe XD, Illustrator, Framer, Jitter, Spline 3d, Blender.
- **AI/ML:** Prompt Engineering (design + development workflows) Python, CNNs, Vision Transformers, XGBoost, Scikit-learn, NLP, LLM Integration
- **Interpersonal:** Empathy, Communication, Teamwork, Storytelling, Conflict Resolution, Leadership, Cross-Functional Collaboration

VOLUNTEER EXPERIENCE

UI/UX Designer – Android Club, Chennai

Apr 2024 – July 2025

- **Fusion War (Techno VIT 2024):** Served on the design team, creating the official mobile UI challenge and event visuals for a design-to-code competition, enabling developers to bring provided UI concepts to life.
- **Hack-N-Droid (24-Hr Hackathon):** Part of the organizing design team for a 24-hour hackathon hosting 267 teams (including 73 external teams), delivering branding, marketing creatives, and a seamless visual experience across the event.
